Professional Summary

Final-year B.Tech CSE-AI student at Parul University with a CGPA of 8.87, strong problem-solving skills, and hands-on experience in full-stack development and AI-powered applications. Proficient in Java, JavaScript, Python, React, Next.js, Node.js, and databases. Experienced in building secure, real-time applications using REST APIs, authentication, and role-based access control. Solved 500+ problems on LeetCode, with a strong interest in software engineering and scalable application development.

Education

Parul University, Vadodara, India Expected Graduation: May 2027

- Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE-AI) CGPA: 8.87

Skills

Languages: Java, JavaScript, Python, C++, SQL, HTML5, CSS3

Frameworks & Libraries: Flask, Django, React, Next.js, Node.js, Express.js, SQLAlchemy, OpenCV, Socket.IO

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Cloud & Platforms: AWS , ServiceNow, Docker, Linux

Tools: Git, GitHub, VS Code, Postman, Cloudinary, WebRTC

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs, Authentication & Authorization (JWT/OAuth), RBAC, SDLC, MVC Architecture

Projects

ReCircle — Student Campus Marketplace (Live Demo) (GitHub)

Tech Stack: Next.js 15, React 19, Node.js, MongoDB, Mongoose, JWT, Google OAuth 2.0, Cloudinary, Tailwind CSS

- Architected a full-stack campus marketplace for product listings and freelance service bookings, built on Next.js 15 App Router with a MongoDB/Mongoose backend and Cloudinary image hosting.
- Implemented JWT and Google OAuth 2.0 authentication with RBAC, OTP-verified product handoff, and atomic MongoDB transactions to eliminate race conditions during deal completion.
- Engineered a real-time chat system with tabbed negotiation UI, automated order-event messages, and price guardrails (±200% caps, integer-only pricing) for fair and transparent transactions.

Automated Student Attendance Monitoring System (AI-Powered) (Live Demo) (GitHub)

Tech Stack: Python, Flask, face_recognition (dlib), OpenCV, WebRTC, Socket.IO, SQLAlchemy, SSH Tunneling, SQLite, NumPy

- Architected a multi-tenant AI attendance platform enabling parallel sessions across multiple institutions with strict data isolation and RBAC-based dashboards for Admins, Teachers, and Students.
- Engineered a real-time biometric pipeline using dlib (128-D embeddings) and Socket.IO, with secure SSH tunneling to utilize global smartphone cameras as wireless remote attendance nodes.
- Developed a robust biometric data persistence layer with automated folder migration, ensuring complete synchronization of facial data across student class transitions, organizational renames, and system restarts.

Certifications

ServiceNow: Certified System Administrator (CSA) (Certificate)

ServiceNow: Certified Application Developer (CAD) (Certificate)

AWS: Cloud Essentials Knowledge Badge (Certificate)

AWS: Academy Cloud Foundations (Certificate)

IBM: Artificial Intelligence Fundamentals (Certificate)

Smart Interviews: Smart Coder - DSA (Certificate)

Competitive Programming

- LeetCode: Rating 1807, Solved 500+ problems. (Profile)
- CodeChef: Rating 1470 (2-Star), Solved 1000+ problems. (Profile)
- Codeforces: Solved 200+ problems. (Profile)
